

PRESS RELEASE

August 2014

New accessories for high-pressure diaphragm pump WAGNER Cobra

WAGNER Cobra is the only high-pressure diaphragm pump for up to 250 bar material pressure. The high reliability and low maintenance effort allow a constantly excellent surface quality in the liquid coating business. Due to the reduced internal volume, it is the ideal pump for frequent paint changes.

The 2 Liter hopper with a quick exchange system and shut-off valve for the Wagner Cobra 40-10 allows a quick color change including intermediate flushing when multiple hoppers are in use. This works also when the hoppers are not completely empty.

The 20 Liter stainless steel hopper is perfectly suited for large amounts of paint. It is especially advantageous for the processing of paint with higher viscosity.

The WAGNER Cobra 40-10 respectively 40-25 can be mounted horizontally to the new trolley. It allows maximum maneuverability and flexibility in the workshop or coating booth.
