New by WAGNER: PROTEC GM 1

Airless manual gun for optimal coating results in heavy-duty corrosion protection

With the PROTEC product family, WAGNER offers tailored solutions to meet the demands of protective coating applications. Especially the application of high solid and highly viscous coating material makes great demands on application technology.

The new Airless manual gun WAGNER PROTEC GM 1 has proved itself with superior technical and ergonomic advantages: With its unmatched ease, compact design and low trigger force, it enables fatigue-free working – even at the highest operating pressure. The fast and easy change of nozzles and the WAGNER cage filter guarantees high availability without interruptions. The WAGNER ProfiTip nozzle offers an easily adjustable nozzle guard and the possibility to get rid of blockages quickly using a 180° rotation of the nozzle. This ensures excellent spraying properties. Thus, the PROTEC GM 1 enables optimal coating results even at the most difficult conditions.

The Airless manual gun is available with a 2- or 4-finger trigger, suitable for different material pressures and ergonomic demands. The choice of the WAGNER PROTEC product family enables to combine the manual gun with further tools and accessories for heavy-duty corrosion protection. Whether WAGNER IceBreaker high-pressure piston pumps for reliable material supply, the electronic mixing system WAGNER PROTEC TwinControl or the mechanical 2-component system WAGNER PROTEC 2K – every operator will find the products suitable for his requirements to achieve a reliably high surface quality. System accessories like suction hoses or tanks complete the large variety of available products.

About WAGNER:

WAGNER is a leading manufacturer of high-tech components and systems for the surface application of wet and powder coatings as well as paints and other liquid media. WAGNER surface finishing systems are used both in the industrial sector and by craftsmen and DIY enthusiasts.

WAGNER boasts a full range of products and technology, from material feeders through mixing, dosing, movement and control systems including material logistics to the surface application of the various media. Completing the product portfolio are booth and recovery systems for powder coating as well as gluing and marking systems.

The WAGNER Group has a global presence, with a workforce of approx. 1,450 people, 19 operative companies and around 300 WAGNER agencies worldwide. The WAGNER Group is owned by the Josef-WAGNER Foundations which, in addition to supporting the group of companies, pursue exclusively non-profit, charitable aims.
